- *Diagnosed and repaired computer hardware and software issues*
- *Installed operating systems and drivers on desktop and laptop computers*
- Provided technical support to customers

PROJECTS

E-commerce T-Shirt Shop
Stack: Node.js, Express, MongoDB, Stripe API, EJS (MVC), HTML/CSS
Role: Full Stack Developer
Built a fully functional e-commerce platform for custom t-shirts. Implemented cart and checkout system with Stripe integration, product catalog stored in MongoDB, and MVC architecture with server-side rendering via EJS. Designed the admin panel for order and product management.
🔗infiniteapparelwear.com

Booking Service Platform
Stack: Node.js, Express, MongoDB, Stripe API, EJS (MVC), HTML/CSS
Role: Full Stack Developer
Developed a service booking application allowing users to reserve appointments and make payments online. Built secure user authentication, booking calendar, and payment processing via Stripe. Backend built with Express and MongoDB, using an MVC pattern for clean code structure.
🔗 booking-service

Crypto Tracker Dashboard
Stack: React, Tailwind CSS, CoinGecko API
Role: Frontend Developer
Created a responsive cryptocurrency dashboard that fetches real-time market data using the CoinGecko API. Designed with Tailwind CSS for a modern UI/UX. Features include live price updates, historical data charts, and search/filter functionality.
🔗 crypto-tracker
